五、閱讀測驗：(10%，每題2分)

Every year several thousand people are killed on the roads in Great Britain. Every year between one and two hundred thousand people are hurt. The numbers stand for a lot of traffic accidents and show that roads are never a safe place.

There are traffic rules to make the roads safe, but people don’t always obey the rules. They are careless. If everybody does obey the rules, the roads will be much safer. How can we make the roads safer?

Remember this rule. In Great Britain, traffic keeps to the left. Cars and buses and bikes must keep to the left side of the road, but in most other European countries traffic keeps to the right, such as German and France.

Before crossing the road, stop and look both ways. Look right and left. Then if you are sure that the road is clear, it is safe to cross road. We must always give children a good example and teach them to cross the road safely. Since there are always cars racing on the roads, small children mustn’t stay playing in the street.
